SUMMARY

Software Developer with 3+ years of experience building intuitive apps, dynamic React frontends, and robust backends with Python and NodeJS. Skilled in full-stack development, collaborating with teams, and turning ideas into scalable, high-quality solutions. Currently seeking opportunities in backend development while delivering seamless user experiences. Passionate about innovation and clean architecture.

EXPERIENCE

Software Developer   09/2024 - Present
SimsUShare ↗
- Joined the software engineering team, contributing to desktop Flutter projects and collaborating on cross-platform development initiatives.
- Actively involved in team discussions and planning, gaining insights into the architecture and workflow of Flutter-based desktop applications.

Software Developer   08/2022 - Present
PayRows ↗
- Led full lifecycle development of Flutter applications like NAAB and RemoteOS at Payrows, delivering projects from concept to deployment.
- Independently designed and implemented mobile, desktop, and web applications, owning 100% of the development process.
- Built cross-platform solutions with Flutter, ensuring consistent performance across iOS, Android, desktop, and web platforms.
- Ensured optimization, scalability, and continuous improvement with regular updates and feature enhancements across all platforms.
- Projects: NAAB.app, RemoteOs.io

Software Developer   03/2024 - 08/2024
CodraTech ↗
- Collaborated with a team at CodraTech to refactor and improve the LACTIViTY Flutter app, enhancing its performance and stability.
- Worked closely with developers and stakeholders to fix critical bugs and optimize the mobile app for both iOS and Android.
- Addressed legacy issues in coordination with the team, ensuring seamless functionality and efficient updates.
- Contributed to improving code maintainability and scalability, implementing best practices to future-proof the application within the team structure.

EDUCATION

Mass Communication   09/2022 - 05/2026
Alexandria University - Bachelor of Science
